

ANIMISM

Cultivating Empathy and the Shamanic for Clinicians, Dancers, and Caretakers

The ability to take on the movements of other creatures and forces of nature, to be as an animal, as the wind or a tree, encourages us embody the “other”. One must know oneself truly, to be able to understand the “other”: This surrendering to the unique vibrations of the “other” is the work of the shaman: who heals the community This is the original “empathy”. Empathy is necessary for forming all relationships. Empathy is the foundation of our work as clinicians, parents, and lovers..

This training is vital for guiding our children, whose contemporary foundation for relationship and visual focus is inanimate (computer technology). We will explore the movements of life forces, which through rhythm are all unified.

This exploration will be amplified with classical music and the choreographic etudes of Isadora Duncan. taught by lineage holder, Dicki Johnson Macy, M.Ed, BC-DMT, LMHC. This is a workshop which will both inspire and renew.

What: A fabulous experiential workshop for dancers, clinicians, and all who desire a basic reconnection to their physical and spiritual bodies and to the empowered and glorious relationships to all around them. (no experience necessary)
